

Standard Colors + Coatings

PVDF (Polyvinylidene Fluoride)

SMP (Silicone-Modified Polyester)

CFR-IMP (option)

TUFF COTE[®] (For Tuff Wall[®] or Tuff-Cast[™] panels only)

INTERIOR (Polyester)

★ When using field applied coatings always order Igloo White Polyester for the exterior coating. ▲ Non-SMP/PVDF option. Available on CFR-IMP Panels only. The Galvalume coating process is likely to result in variances in spangle (size, number, and reflection) from coil to coil which may result in noticeable shade variations. Galvalume is also subject to variable weathering and may appear to have different shades due to weathering characteristics. These shade variations are not cause for rejection. Colors shown closely approximate actual coating colors. The term "TBK" or "TBS" on the Order Document refers to "To Be Selected" from standard colors as shown on this chart. Please note that PVDF is a slight upcharge over SMP.

NBG Color Designations

PVDF COOL COLORS

PVDF (Polyvinylidene Fluoride) is a fluoropolymer-based resin used for coating in many industries and applications for their brilliant weather and UV resistance and unique flexibility.

SMP COOL COLORS

Silicone-modified polyester (SMP), also known as silicone-protected or siliconized polyester, is recognized for its superior hardness, durability, and enhanced resistance to scratching and marring.

Council Directory**

Cool Roof Rating Council Directory

The Cool Roof Rating Council (CRRC) is a 501(c)(3) nonprofit organization that develops fair, accurate, and credible methods for evaluating and labeling the radiative properties of roofing and exterior wall products. The CRRC also provides education to the public on how cool roofs and cool exterior walls can help improve building performance, increase occupant comfort, mitigate the urban heat island effect, and reduce greenhouse gas emissions.

PVDF + SMP 2-Coat Color Systems

GALVALUME[®] is a registered trademark of BIEC International Inc. and some of its licensed producers. Galvalume is the substrate to which paint is factory-applied. This coating is what determines the roofing product's reflective properties. All information contained within is subject to change without notice. Please contact your sales representative to ensure most current information. ♦ NOTE: CRRC values are based on a color group (family) not a NBG specific color. The Cool Colors Spec Sheet available by scanning the QR code above has specific values provided by the paint manufacturer.
